# Young Adults

## Acting classes

Ages 14-18

### **Our Philosophy.** *Encourage. Enrich. Empower.*

Our teenage students will be inspired and excited by the world of performance. Classes cover all the essential elements of the craft of screen acting. Students participate in in-class shoots aimed specifically at training the actor for the technical requirements of acting on a set, whether it be for Commercials, TV or Film. Small class sizes ensure a solid learning environment for the student. Whether you want to learn how to get into the exciting world of Film and Television or just want to improve confidence and self esteem through self expression these classes will excite and inspire.

### **Our Curriculum.** *The Full Circle Curriculum.*

The Full Circle Curriculum aims to provide a diverse range of skills which empowers students in the creative field of acting and performance. Classes are conducted in a fun and supportive environment with like minded people, guided by tutors who have unparalleled experience both in front, and behind the camera. We cover all the principles of performance without being limited by one specific technique or style. The curriculum covers voice control, performance skills, audition techniques and script analysis. We teach students how to find the truth within text and enable students to be confident in creating honest and interesting characters. Students are encouraged to take risks and move beyond their comfort zone. Our Curriculum challenges students and fosters each student's unique skills and talents. Taking your first step towards the professional world of Film and Television has never been so easy.
